COMPOSITION OF MILITARY ATCO INITIAL APP RATING TRAINING:

For reference use: AMC1 ATCO.D.010(a)(2)(ii) Composition of initial APP rating training¹

All the following content comes from EASA AMC and includes the amendments coming from the Commission Implementing Regulation (EU) 2023/893 of 21 April 2023 amending Commission Regulation (EU) 2015/340 which was published in the Official Journal of the EU on 4 May 2023.

These amendments are drafted according to the EASA regulatory convention for the introduction of changes compared to applicable provisions, i.e.:

Light blue background = new text inserted

Number represents the level of taxonomy as for [AMC1 ATCO.D.010\(a\) \(a\)\(2\)\(i\) Composition of initial training](#).

The term “National” when used in the composition document should be understood as meaning both civil and military.

Mandatory content should be understood as training content provided in all Member States.

Optional content should be understood as content that might be omitted in Member States where this is not applicable.

Military ATCO Initial Approach Control Procedural Rating training should contain the following subjects, topics, subtopics and training objectives using as baseline the subjects, topics and subtopics contained in Appendix 5 to Annex I of amended Commission Regulation (EU) 2015/340 — Aerodrome Approach Control Procedural Rating training. This might indeed facilitate the potential latter conversion of Military ATCO licences into Civil Student ATCO licences.

The taxonomy of some of the training objectives identified in AMC1 ATCO.D.010(a)(2)(ii) to Commission Regulation (EU) 2015/340 have been highlighted in **bright green** where they required to be adapted to the working requirements and needs of Military ATCOs.

Additional topics, subtopics and training objectives have also been identified and included **in bright yellow** in the Initial APP Rating Training content to take into account the specific training requirements of Military ATCOs.

The composition of the Military ATCO Initial APP Rating Training as presented in this document are the minimum requirements recommended to be implemented by interested military ATCO training organisations. Any Member State might decide to train its military ATCOs giving one or several of the training objectives a higher level of importance hence a higher taxonomy level.

Despite the fact that this document is legally non-binding, in order to achieve standardisation in the initial training of Military ATCOs, Member States which decide to implement it should apply its content as proposed.
