

## Open Cooperation for European mAritime awareNess (OCEAN2020)

Under the Preparatory Action on Defence Research (PADR), a grant agreement was concluded for the Research Action call on Unmanned Systems, focusing on the topic of Technological demonstrator for enhanced situational awareness in a naval environment. The awarded project, called OCEAN2020, was signed on 28 March 2018. Led by Leonardo S.p.A. (IT), its consortium encompasses 40 other participants from 15 Member State countries and one international organization. OCEAN2020, which has a duration of 36 months, is the biggest PADR project and will receive an EU grant of roughly €35 million.

<b>PADR Call 2017-US – Information on the awarded project</b>	
<b>Name of the project</b>	Open Cooperation for European mAritime awareNess
<b>Short name</b>	OCEAN2020
<b>Summary of the project</b>	
<p>Ocean2020 supports maritime surveillance and interdiction missions at sea and to that end will enhance air, naval surface and underwater unmanned systems and integrate them into fleet operations. The information acquired will be combined with the whole set of naval info obtained by existing systems to build up a Recognise Maritime Picture of developing situations for military commanders.</p> <p>OCEAN2020's main objective is indeed to develop integrated system concepts that culminate in large-scale technology demonstrations for enhanced situational awareness in a maritime environment.</p> <p>The planned demonstrations in the Mediterranean and Baltic seas will show how innovative solutions for fusion of multiple data sources can be integrated with Combat Management Systems (CMSs) into a secure network to create a Recognized Maritime Picture. It will also show how collaborative autonomy between multi-domain unmanned vehicles can provide a force multiplier.</p> <p>This will provide End Users with the advantage of interoperability for joint missions and at the same time offer industry an opportunity to build Command and Control (C2) modules in a multi-company environment.</p> <p>To be successful in reaching these goals, the OCEAN2020 Consortium will solve the problems of integrating EU systems as well as integrating the individual organisations into a coherent team.</p>	
<b>Project duration</b>	36 months
<b>Starting date</b>	1 April 2018
<b>Maximum foreseen EU Contribution</b>	€ 35.480.000,00
