

# A new Airworthiness Roadmap for the MAWA Forum

# Content

- Introduction and background
- Airworthiness Roadmap
- Status Summary and Future Outlook
- Challenges

# Background (1)

## Development of a harmonised European Military Airworthiness System

- Permanent arrangements for the continuing development of common airworthiness policies and maintenance of the EMARs and related documents
- Arrangements for a uniform and consistent exchange of oversight information, re-use of oversight artefacts by NMAAs and the sharing of oversight obligations with respect to European based defence industries
- A blueprint for a regulatory and oversight system and its related functions that will serve as a benchmark for pMS
- Common minimum knowledge, experience and training requirement baselines for technical personnel carrying out military airworthiness oversight functions
- Harmonised oversight processes and procedures for technical staff involved in oversight

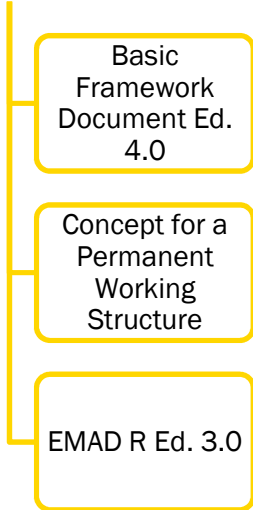

# Background (2)

## Implementation of a harmonised European Military Airworthiness System

- The use of the EMARs as baseline for the national regulation of military airworthiness
- The implementation of the harmonised processes and procedures to ensure that personnel and organisations performing an aviation activity meet the established requirements or equivalent level of safety before being allowed to exercise the privileges of a license, certificate, authorisation and/or approval
- The implementation of the harmonised standards and best practices for the execution of a continuous surveillance programme consisting of inspections and audits to ensure that aviation licence, certificate, authorisation and/or approval holders continue to meet the established requirements and functions at the level of competency and safety required by the pMS
- The implementation of the harmonised processes and procedures regarding the resolution of identified deficiencies impacting on aviation safety (safety concerns)
