“2020 Innovation in Defence Prize”

Innovative Solutions/Technologies for the
Countering of Swarms of UAVs, specifically on the
Protection of Static and Dynamic Land Facilities
and Platforms

RULES OF CONTEST

1. THE INNOVATION FOR DEFENCE PRIZE

1.1. OBJECTIVES PURSUED

Through this “**2020 Innovation in Defence Prize**” contest, the European Defence Agency (EDA) aims to stimulate engagement of all R&T communities and innovators¹ in order to accelerate access to emerging and potentially disruptive research and if possible, to identify areas in which additional investment is needed to fully address future defence capability needs.

The objective of the contest is to reward innovative defence-related ideas which could be in the future implemented through a collaborative R&T effort within an EDA framework.

It is expected that the prize will stimulate involvement of innovative industrial and research entities within the EDA R&T framework and will contribute to the generation of new defence research projects by exploiting all the possible defence research funding instruments, in accordance with their respective provisions.

The contest will also provide a good opportunity **to small and medium sized enterprises**, research organizations, universities and companies, **non-traditionally involved in defence R&D activities**, to demonstrate their know-how, maximize dual-use synergies and to form valuable partnerships with key players in the defence field.

This contest will reward innovative defence-related ideas addressing the area of “innovative solutions/technologies for the countering of swarms of Unmanned Aerial Vehicles (UAVs), specifically on the protection of static and dynamic land facilities and platforms”, covering the following topics:

- the detection and identification of swarms of small drones (many units acting in a coordinated manner);
- mitigation measures incorporating the capability to intercept, disable and neutralise hostile vehicles;
- the minimising of collateral damage.

The prize winner is expected to propose ideas which would, if implemented between now and 2030, contribute to improve and enhance specific EU defence capabilities.

1.2. REQUIREMENTS

Applications must be original ideas from applicants. They may propose new or improved ways to implement existing solutions, combine them, or adapt them to a different context or target group, but they cannot be exact copies of those.

The applicants must demonstrate the novelty of their solution, in comparison with those already developed/implemented by themselves or by others in their context.

The applicants are also expected to indicate how the participation in the contest may benefit their idea (e.g. prize, mentoring, networking, visibility or other related benefit).

¹ Albeit no defence specific expertise and/or background is required to participate to the contest, participation from entities already involved in defence related activities is not excluded.

The proposed ideas need to be innovative, implementable through a collaborative project, and affordable in development and exploitation.

Ideas shall be related to the prize topic (section 1.1) and might include, but are not limited to:

- Proposal of development of new technologies and techniques;
- Creation of new engineering processes, operational doctrine, services and capabilities;
- Application and/or adaptation of existing technologies to a different problem or domain.

1.3. AMOUNT OF THE PRIZE

EDA will award of the prize to the best idea in the light of the award criteria set out below, with a value of 30 000€. In addition, EDA will cover the travel expenses and accommodation, for the winner (up to two representatives) to attend the award ceremony for an amount of up to 1 000€ per representative.

1.4. ADDITIONAL BENEFITS

The contest has been conceived to offer more than the financial prize. In particular, other incentives will include:

- The winner will have the possibility to promote its idea through a dedicated article in one of the issues of the EDA magazine (Defence Matters);
- The final award ceremony will be delivered in a formal EDA ceremony with press release coverage;
- The Innovation prize will receive significant coverage on the EDA website and social medias (the name of the winner will be published on EDA channels);
- The prize winner will be given access to the EDA network of experts, having the opportunity to form valuable partnerships to leverage on some of the EDA (e.g. the winner will be also provided with the opportunity to present the idea to the CapTech for potential implementation through a MS funded Cat A or Cat B Project) and EU R&T funding opportunities.
