EATT 2017

The Portuguese Air Force will carry out, between 19 and 30 June, the multinational exercise "EATT 2017", under the Tactical Air Transport Aircraft exercise program of the European Defence Agency.

EATT17 is based on Air Base 11, in Beja, where the participating forces will be stationed.

This year's edition has the participation of military forces from France, Germany, Italy, the Netherlands, Poland, Romania and the United Kingdom, in addition to the Portuguese Air Force and Army. Their actions are planned to happen mainly in the Center / North Continental Portugal.

GOALS

EATT17 aims to train and prepare the crews of the Air Force tactical transport squadrons, guaranteeing that the participating forces are ready to carry out the tasks assigned to them in any theatre of operations within the European alliance's areas of operation. In addition to the individual training, the exercise will foster a better interoperability among the various participating forces.

SCENARIO

During EATT, appropriate scenarios for each type of mission are developed, according to the characteristics and requirements of each type of aircraft.

Interoperability among the various countries is the key to success in joint operations. Bearing this in mind, air and ground threats will be included in the scenarios making them as close as possible to real situations.

Missions

-  Air-Transport Operations;
-  Airlift Operations;
-  Air Logistic Support Operations;
-  Airborne Operations;
-  Airdrops (Cargo and Paratroopers);
-  Aeromedical Operations;
-  Non Combatant evacuation Operations;
-  Support of Special Operations Forces.

Operations Area

OPERATIONS AREA OF EATT 2017

OPERATIONS AREA: 192 227 KM²

MARITIME AREA: 103 515 KM²

LAND AREA: 88 712 KM²
